SYSTEMS

About Us

Dynamic Systems- Your Ideal IT Partner.
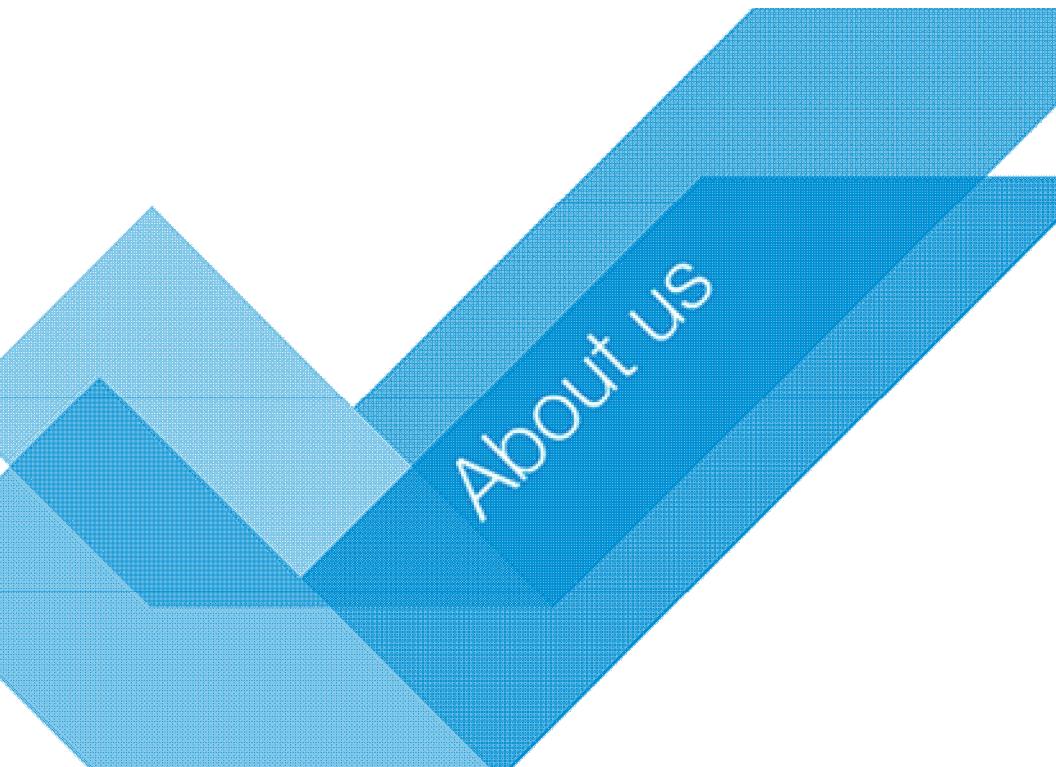

About Us

We are the Next Generation of Creative Agencies in the World!

Dynamic-Systems is a registered company based in Nairobi that provides technology services delivering business solutions to its clients. As a business unit, Dynamic-Systems' delivers a broad portfolio of information technology applications and business process outsourcing services to clients. Our clients vary from manufacturing; financial services; healthcare; communications, media and entertainment; energy; transportation; consumer and retail outlets and the government.

How Do We Do It?

Our portfolio is built around innovative offerings in applications services, business process outsourcing and infrastructure technology outsourcing. This enables our clients to respond quickly to changing market dynamics and increase their competitiveness. Dynamic Systems builds on its strong services heritage of meeting, and exceeding, clients' needs every day – driving their business performance all along the way. Time and again, the people at Dynamic-Systems prove they never give up until the job is done for our clients.

Our Pledge To You

Dynamic-Systems is committed to providing high-quality professional services and to conducting business ethically and with integrity. In short, our company commitment to integrity is one of the core values that link each of us, regardless of location, work assignment, language or customs.

Our Mission

To provide solutions which enable our customers to achieve excellence and sustainable competitive edge.

Our Core Values

Dynamic Systems-Your Ideal IT Partner.

.
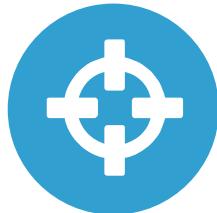

Innovation

Flexibility is the key to our offerings, and intrinsic to this flexibility, is the spirit of Innovation that we bring to our products and services - from the very stage of design to implementation and customer support.
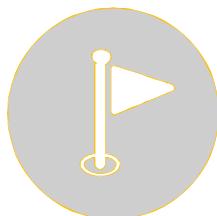

Insight

At Dynamic-Systems, we pride ourselves on the vision, skills, expertise and professionalism of our team. Our team members make use of their keen Insight to foresee industry trends and meet demanding customer needs. And the working of their collective minds in a highly supportive environment ensures that our products and services retain a competitive edge at all times.

Integrity

At Dynamic-Systems, we look at the Core Value of Integrity as the very soul of our company. This is reflected in our finances, the trusted relationship that we share with our customers and business partners, and the faith reposed in us by our stakeholders.

-Industrial, Oil & Gas Website

-Domain Reservation and Hosting and much much more....

NETWORKING SOLUTIONS

NETWORKING SOLUTIONS

LAN, WLAN, WAN, VPN, Fiber Optic Solutions,Firewalls e.t.c

Dynamic Systems has expertise in all the major network types, and can guide you in making the best choices to meet your needs. Common network types with which we work include:

Cable Networks - These cable networks can handle the latest gigabit Ethernet and voice technology. Dynamic Systems has proved its proficiency in designing and installing the cabling infrastructure to meet your requirements today, with the flexibility to accommodate future growth and demands.

Wide Area Networks (WAN) - If you need a multi-location solution for a distributed organization, a WAN might be the answer. There are several models of WAN to consider: frame, leased lines, VPN (Virtual Private Network) or dial up.

Wireless Networks - For smaller or more dynamic environments, a wireless network would be a cost-effective alternative solution to cabling. Internet connectivity by utilizing new DSL technology and secure firewalls can provide faster downloads and inter-site access to meet your exact requirements.

Local Area Networks (LAN) - Our experience for several years briefs us that building a LAN to link the personal computers in small organizations will increase their online effectiveness by many folds. Connecting the organization's computers, printers, servers and other peripheral equipment on a common platform lets the users share expensive hardware, application programs and exchange data files quickly, easily and reliably. These LANs make e-mail possible, support centralized data backups, and provide access to the Internet.

Fiber Optic Solutions – Dynamic Systems designs and markets a broad range of fiber optic transmission systems for point to point and point to multi-point fiber optic technology.

CCTV SURVEILLANCE

CCTV SURVEILLANCE

IP Cameras, DVR Supply, Analogue Cameras, IP Cameras, NVR, Jovision, Remote CCTV Access

There have been many instances covered by the media where CCTV surveillance helped in investigations of different criminal and disastrous incidences.That said the importance of having CCTV systems anywhere can never be overemphasized. Dynamic Systems delivers world class, top quality CCTV installation to clients all over Kenya. We have an effective technical team that can handle simple to complex installations. Our personnel is known to be courteous and professional so you can be sure that your installations are being handled by excellent staff.

We believe that customer is king and have had great customer reviews.We strive to always have a good working relationship with our customers. Some of the people who have used our systems include residential users, commercial users and government institutions among others.

BIOMETRIC SYSTEMS

BIOMETRIC SYSTEMS

Limit Access Into Certain Areas,Finger Print Access. IRIS Access, Card Access e.t.c

Our biometric solutions will give you a very easy and secure method of identity verification. In most computer systems, measures such as PIN, passwords, cards and keys are used for identity verification. The bad thing about these measures is the fact that people often change, disclose or forget them. An accurate and reliable technique of identification/verification can be designed by use of biometric technologies.

Biometric/Access control systems are security devices that control entry to a premise. The biometric door lock utilizes finger print reader technology to lock and unlock your door. You can always set, re-set or remove the fingerprint access information on the device. Our biometric systems are able to log over a thousand users and keeping all logs in the system database. Like other security products, biometric access control systems can be advanced by integration with other systems. The biometric system can be used by human resource to assist in time management and payroll.

ERP & CRM

ERP & CRM

Enterprise Resource Planning And Client Resource Management Systems

Dynamic Systems can implement a system that enables you to identify and understand your most profitable customers, strategize interactions, and continuously improve your organization's marketing performance. Our CRM and ERP are a multifaceted process, mediated by a set of IT solutions that focuses on creating two-way exchanges with customers so that firms have an intimate knowledge of their needs, wants, and buying patterns. It helps companies understand, as well as anticipate, the needs of current and potential customers. Some of the focus areas include sales, marketing, customer service, training, professional development, performance management, human resource development, and compensation.

The CRM Intelligence helps in translating customer needs and profitability projection into game plans for different segments or groups of customers, captured by customer interactions (Human, automated or combinations of both) into software that tracks whether that game plan is followed or not, and whether the desired outcomes are obtained. It helps in Modeling the Customer Relationship Strategy, Goals and outcomes. Numbers and description of whether goals were met and models of customer segments and game plans worked as assumed is been reported by the monitoring tool.

FLEET MANAGEMENT

FLEET MANAGEMENT SYSTEM

Fleet Management, Fuel Management, Car Tracking e.t.c

Our Fleet Management System uses state of the art technology in the Kenyan market, making our Fleet Management package second to none. We believe in quality, affordability and giving everyone a chance to secure their fleet of vehicles be it commercial or private. Its main features include:

-Current location report

-Tracking by time interval

-Built - in motion sensor for power saving

-SOS panic button

-Geo-fencing control

-Low battery alert

-Speeding alert

-Engine Cut by SMS

-Digital Input for Engine Control

-User Name and Password to access the Fleet Management System

-Engine Temperature

-Over speed Detection Reports

-Brake PSI Reports

-Drive Identification and RFID Codes

And a lot more
